

CONNECTION ENGINEERING

McKinney Memorial Bible Church Fort Worth, Texas

Fabricator:	Hirschfeld Steel Company, Inc.
Completion Date:	2003
Building Use:	Religious Facilities
Building Size:	80 tons
Building Type:	Structural Steel Frame

Project Description: Structural Solutions, Inc. provided connection engineering services for numerous long span trusses. The varying roof planes and slopes required intricate coordination of truss end connections with the supporting steel. Truss configurations consisted of wide flange chords and both hollow structural section and wide flange web members.
